-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**DETAILED ACTION**

***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-21, 30-37 and 63-65, drawn to guards to verify the literal integrity of at least one program instruction, watermark or parameter, classified in class 718, subclass 187.
  - II. Claims 22-29, 38-45, 54, 55 and 66, drawn to methods to resist alteration of a software program by obfuscating code blocks, including disguising, altering flow, repairing, or linking code blocks, classified in class 713, subclass 190.
  - III. Claims 46-53 and 56-62, drawn to silent guards verifying the integrity of a variable, classified in class 713, subclass 194.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions of Group I, Group II and Group III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention of Group I has separate utility such as verifying the literal integrity of at least one program instruction, watermark, or parameter; invention of Group II has separate utility such as resisting alteration of a software program by obfuscating code blocks, including disguising, altering flow, repairing, or linking code blocks; and invention of Group II has separate utility such as verifying the integrity of a variable. See MPEP § 806.05(d).

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II or Group III and the search required for Group II is not required for Group I or III, and the search required for Group III is not required for Group I or II, restriction for examination purposes as indicated is proper.

5. A telephone call was made to Thomas A. Walsh on January 31, 2005 to request an oral election to the above restriction requirement, but did not result in an election being made.

6. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim

remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
